Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/760,018

Applicant(s)

OLSON, CHUCK

Examiner

Michael Brown

Art Unit

3764

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

Claims 1-17 are objected to because of the following informalities: There is a period in claim 1, line 2 and claim 3, line 2 that must be removed. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 10, 12-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Sevier '555.

Sevier '555 discloses in figures 11 and 17 a hand-held ergonomic reflexology device comprising a handle 44, defined by an inner edge (the inner edge is on the same side as reference numbers 42-43, in fig. 11), a lower edge (fig. 11), a first end (on the same end as reference number 66, in fig. 11), an opposite end (at 58), a thumb support 48, being integrally connected to the handle at the first end and protruding outwardly therefrom to a sensor tip (at 64) on its apex, the thumb support being dimensioned to support the circumference of the user's thumb (fig. 17), the handle is cylindrical (fig. 11), the handle and the thumb support being dimensioned to fit inside the user's hand, the thumb support member has substantially a partially enclosed elliptical shape (fig. 11, the lower portion of 48 provides a substantially a partially enclosed elliptical shape), defined

by an upper surface area (fig. 11), inner curved peripheral edge (fig. 11), an outer curved peripheral edge (fig. 11), the upper surface area having a circumference (fig. 11), dimension to accommodate the thumb, the outer curved peripheral edge extending from the tip portion proximally near the upper edge of the outer edge of the handle and the inner edge curved peripheral edge extending from the tip portion to an arc (fig. 11), therein to resemble a small hand gun, the thumb support further comprises a groove 66, a means (the tip 64), for transmitting proprioceptive sensitivity from the sensor tip, the thumb support member and the handle are dimensioned to fit a (small, medium or large hand fig. 11), the opposite end of the handle has a blunt tip 58, an outer peripheral edge extending from the tip portion through the outer peripheral curved edge of the thumb support (fig. 11), the outer peripheral edge is structured with sufficient depth to apply pressure, an inner peripheral edge extending from the tip portion through the inner peripheral curved edge of the thumb support, the inner peripheral edge of the thumb support member is structured with sufficient depth to apply pressure and the thumb support member can accommodate either hand (left or right).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 11 and 18-21 are and rejected under 35 U.S.C. 103(a) as being unpatentable over Sevier '555 in view of Beaty '781.

Sevier '555 discloses in figures 11 and 17 a hand-held ergonomic reflexology device, substantially as claimed. However, Sevier doesn't disclose the handle and the support being a smooth rigid material that includes wood or plastic. Beaty teaches in figures 1-2 a reflexology device that has a handle 12, and a thumb support member 16 that are made of a smooth rigid material (wood or plastic, section 0018, lines 11-13). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the device disclosed by Sevier could be fabricated of a smooth rigid material as taught by Beaty. The smooth rigid material as taught by Beaty could be used to massage different portions of the body. Sevier, also discloses that the thumb support and the handle are rigid. Thus, it is simply a choice of material to form the device of plastic or wood. The method steps recited in claims 18-21, are within the scope of the massaging procedures disclosed by Sevier.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolocko and Johansson each discloses a massaging device.

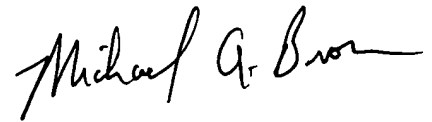

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brown whose telephone number is 571-272-4972. The examiner can normally be reached on 5:30 am-4:00 pm Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gergory Huson can be reached on 571-272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
